

Steps to upload Teams Background

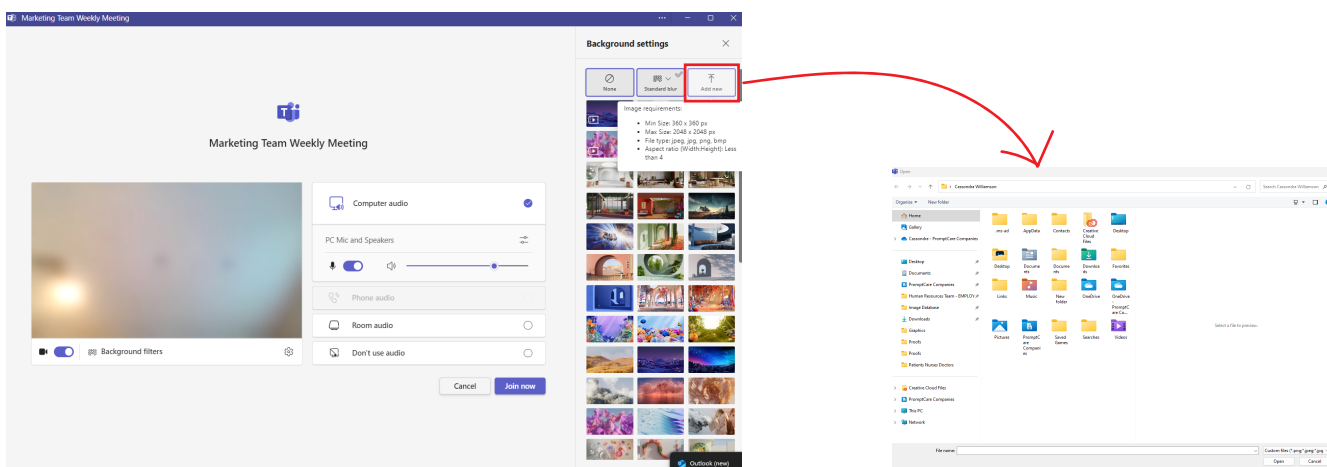

Step 1: Navigate to the Brand toolkit and scroll to the bottom and click on the “Social Media Banners and Meeting Backgrounds” Button. Click on one, two, or all preferred backgrounds you would like to utilize. Then download and save to a preferred location locally on your PC or Laptop.

Step 2: When joining a meeting, click on the “Background Filters” button located below the video preview screen on the left

Step 3: This will cause a pop out on the right side of the Teams Panel. From there, click on the “Add New” button and locate where you have saved the preferred backgrounds locally on your device to select the file.

Step 4: Once file is selected, it will automatically appear as your background in the preview screen and will continue to be able to be selected at the bottom of your “Background Filters” section. You are now ready to join your meeting!
